Paris, le 04 Mars 2022

**Vos Réf.** Mr Didier Buffet

I hereby wish to support the candidacy of Mr Didier Buffet.

I have known Mr Buffet for many years, through our professional interactions in the field of hematology, dating back to the time of the initial development of thalidomide in multiple myeloma.

Although Mr Buffet has never worked in the hospital sectors where I practiced, I had many opportunities to meet him at various professional events in hematology. Through our discussions, I have always appreciated his in-depth knowledge of his subjects of interest and the drugs he represents. His spirit of critical analysis of scientific data is a major asset, and greatly facilitates communication with doctors and other professionals in the world of hematology.

In addition to the scientific aspects and his organizational rigor (eg a professional event he planned and organized in Besançon a few years ago, and in which I participated as a speaker), Mr Buffet has a respectful and is attentive to the needs of its interlocutors according to the testimony of many colleagues that I know. He exercises his missions with modesty and is aware of the complexity and rapid development of the hematology specialty. In addition, I have always felt through his speech a lot of empathy and humanity, which are essential qualities when one has to evolve in the world of hematological malignancies.

I remain at your disposal for further informations

Prof. Mohamad MOHTY, MD, PhD  
Chef de Service
